# CAUTION

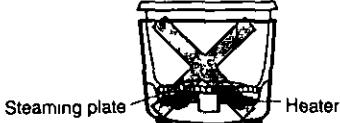

**1** • Make sure that the pan is sitting properly in the cooker  
If the pan is not positioned correctly, the switch may click off too soon or the heater may be damaged

• Do not leave the steaming plate between the heater and the pan

Your rice cooker has been designed with a thermal fuse which may shut the heater off in these cases

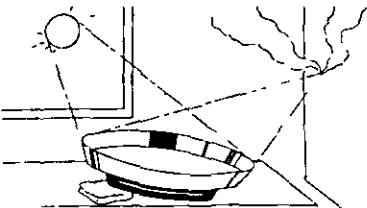

• Be sure the switch is off before removing the pan

**2** Replace all damaged parts immediately

**3** Do not leave the lid down-side up in places subjected to direct sunlight

If direct light is subjected to the concave side of the lid, it may focus on furniture, walls, etc., and damages may result

**4** Do not tilt the rice-cooker on its edge or place it upside down with its power supply plug connected, as this may cause damage

## KEEP WARM FUNCTION

- After cooking is completed, "Keep Warm" automatically functions until the cord is unplugged
- Always unplug before taking the pan out of the cooker
- Do not switch to "Rice Cooking" again during "Keep Warm" function
- Do not keep rice warm for more than 5 hours
